Contains 4 environmentally safe traps. Lasts for up to 3 months.

NET CONTENTS 4 Traps

Includes 4 Traps  
+ 4 Garden Stakes

GARDENER'S CHOICE™

# APHID & WHITEFLY TRAP

GARDENER'S CHOICE™ Aphid & Whitefly Trap helps control infestation of Aphids, Thrips, Spidermites, Fungus gnats, Scale insects, Whiteflies and other small flying insects that will infest house plants, gardens, and greenhouses throughout the season.

The Aphid & Whitefly Trap attracts insects by imitating a healthy plant leaf, and kills insects by catching them on the sticky glue surface. It is essential to catch insects as soon as they appear to avoid a more serious insect infestation problem. These insects damage plants by feeding on their saps and or leaves thus starting the infestation process. If not treated, this will lead to further damage of plants. Long term use of this trap will reduce infestations without the use of toxic chemicals. Place traps early in the season to prevent infestation from establishing.

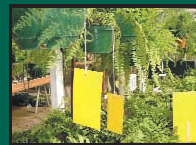

### Easy Instructions:

Peel Paper

Place In Pot

Hang On Stake

Stake Along Edges

Peel the release paper from the trap. Place trap where insects have been seen. Place the trap on end or on its side in pots, hang it using a twist tie or string, or attach it to one of the enclosed stakes. Put traps near and above fruit, vegetables or other sources of insects. Use one trap per infested group of four plants, or, for heavy infestation, use one trap at the base and one at the crown of each infested plant. Dispose of traps when they are full or after 3 months. These traps are made of paper, not plastic, and can be composted or placed in a worm bin.

In case of contact, remove glue with vegetable oil. Safe for organic uses. Contains no pesticides. Place out of reach of children and pets.
